CEQA Initial Study - Environmental Checklist Form (Based on the State CEQA Guidelines, Appendix G Rev. 10/04)

1. Project Number(s)/Environmental Log Number/Title:

P69-129W⁴, Log No. 04-18-003; Trinity Presbyterian Church of Spring Valley

2. Lead agency name and address:

County of San Diego, Department of Planning and Land Use 5201 Ruffin Road, Suite B, San Diego, CA 92123-1666

- 3. a. Contact Ed Gowens, Project Manager
 - b. Phone number: (858) 505-6380
 - c. E-mail: ed.gowens@sdcounty.ca.gov.
- 4. Project location:

3902 Kenwood Drive, Spring Valley

Thomas Brothers Coordinates: Page 1271, Grid A/5

5. Project Applicant name and address:

Carl H. Starrett II, 1941-C Friendship Drive, El Cajon, CA 92020

6. General Plan Designation

Community Plan: Spring Valley

Land Use Designation: (22) Public/Semi-Public Lands

Density: None

7. Zoning

Use Regulation: RS Single-Family Residential Minimum Lot Size: 6,000 & 10,000 square feet

Special Area Regulation: "S" Scenic Area

8. Description of project (Describe the whole action involved, including but not limited to later phases of the project, and any secondary, support, or off-site features necessary for its implementation):

The project proposes a Major Use Permit Modification for renovation and improvement of existing uses in three phases as part of an existing religious assembly facility. The existing buildings consist of a 6,522 square-foot church sanctuary, a 7,989 square-foot fellowship and administrative buildings, a 4,815 square-foot education building, an adult classroom and library modular buildings totaling 1,932 square-feet, and 2 modular classroom buildings of 1,440 and 1,584 square feet with a 300 square-foot restroom facility. Phase 1 of the project proposes to add a 5,040 square-foot gymnasium to replace an existing outdoor sport court with no change in operation hours. Phase 2 of the project proposes to replace the two adult center and library modular buildings with a single 3,240 building with no change in operation hours. Additionally, Phase 2 would include a proposed columbarium of 800 square feet. Phase 3 would replace the classroom modular buildings and restroom facility supplemented with four additional classroom spaces for a total 8,728 square-foot building.

9. Surrounding land uses and setting (Briefly describe the project's surroundings):

Lands surrounding the project site are developed with single-family residences. The site is located within the viewshed of State Route 94.

10. Other public agencies whose approval is required (e.g., permits, financing approval, or participation agreement):

Permit Type/Action	Agency
Landscape Plans	County of San Diego
Major Use Permit Modification	County of San Diego
Minor Grading Permit	County of San Diego
Water District Approval	Helix Water District
Sewer District Approval	Spring Valley Sanitation District
Fire District Approval	San Miguel Consolidated Fire
	Protection District

ENVIRONMENTAL FACTORS POTENTIALLY AFFECTED: The environmental factors checked below would be potentially affected by this project and involve at least one impact that is a "Potentially Significant Impact" or a "Potentially Significant Impact Unless Mitigation Incorporated," as indicated by the checklist on the following pages.

	A Initial Study, 129W ⁴ , Log No. 04-18-00	- 3 - 03	July 27, 2006

	THETICS Would the project: lave a substantial adverse effect o	on a scenic	vista?	
	Potentially Significant Impact Potentially Significant Unless Mitigation Incorporated		Less than Significant Impact No Impact	
Discuss	ion/Explanation:			
unobstr vistas a State R and visi landforr The visi The pro a religio compati because	ble components of the landscape in and overlaying landcover, estabual composition consists of sloping posed project includes renovation as single-face assembly use within a single-face.	including a sed project is area spect within that within that within that within the visus and improvamily resident ments in temarily euca	reas designated as official scenic is located within the viewshed of ital area regulation. The viewshed viewshed, including the underlying ital environment for the scenic vista. In hills framing the state highway. It we ment of existing uses comprising the ential neighborhood. The project is the erms of visual character and quality lyptus trees, provide effective	
The project will not result in cumulative impacts on a scenic vista because the entire existing viewshed and a list of past, present and future projects within that viewshed were evaluated. Refer to XVII. Mandatory Findings of Significance for a comprehensive list of the projects considered. Those projects listed in Section XVII are located within the scenic vista's viewshed and will not contribute to a cumulative impact because effective landscape screening of the project eliminates potential for it to contribute to cumulatively considerable impacts. Therefore, the project will not result in any adverse project or cumulative level effect on a scenic vista.				
•	Substantially damage scenic resound transfer in the substantially damage scenic resources.		<u> </u>	
	Potentially Significant Impact Potentially Significant Unless Mitigation Incorporated		Less than Significant Impact No Impact	

No Impact: State scenic highways refer to those highways that are officially designated. A scenic highway is officially designated as a State scenic highway when the local jurisdiction adopts a scenic corridor protection program, applies to the California Department of Transportation for scenic highway approval, and receives

notification from CalTrans that the highway has been designated as an official Scenic Highway. While the proposed project is within the viewshed of State Route 94, that highway is not a State scenic highway, and thus, the proposed project will not have any substantial adverse effect on a scenic resource within a State scenic highway.

c)	Substantially degrade the existing surroundings?	ng visual char	acter or quality of the site and its
	Potentially Significant Impact Potentially Significant Unless Mitigation Incorporated		Less than Significant Impact No Impact
Discu	ssion/Explanation:		
	TI 0: 'C' 11 1 1 1		

Less Than Significant Impact: Visual character is the objective composition of the visible landscape within a viewshed. Visual character is based on the organization of the pattern elements line, form, color, and texture. Visual character is commonly discussed in terms of dominance, scale, diversity and continuity. Visual quality is the viewer's perception of the visual environment and varies based on exposure, sensitivity and expectation of the viewers. The existing visual character and quality of the project site and surrounding can be characterized as dominated by single-family residences of similar scale with slight diversity introduced by the church site cross rising above trees and the steeper pitch of the church sanctuary roof as compared to the lower-pitched roofs of residences in the vicinity.

The proposed project will largely replace existing structures with more modern buildings which will be architecturally consistent with the existing church sanctuary and ancillary buildings. Because the project will not introduce a substantial amount of new development to the site, it will not significantly change the existing visual character.

The project will not result in cumulative impacts on visual character or quality because the existing viewshed consists of built-out single-family residential lots and no additional development could further degrade the existing visual quality of the viewshed. Therefore, the project will not result in any adverse project or cumulative level effect on visual character or quality on-site or in the surrounding area.

d)	Create a new source of substantial day or nighttime views in the area?	light or gla	re, which would adversely affect
	Potentially Significant Impact	$\overline{\checkmark}$	Less than Significant Impact
	Potentially Significant Unless Mitigation Incorporated		No Impact

Less Than Significant Impact: The proposed project will use outdoor lighting and is located within Zone B as identified by the San Diego County Light Pollution Code. However, it will not adversely affect nighttime views or astronomical observations, because the project will conform to the Light Pollution Code (Section 59.101-59.115), including the Zone B lamp type and shielding requirements per fixture and hours of operation limitations for outdoor lighting and searchlights.

In addition, the proposed project will control outdoor lighting and sources of glare in the following ways:

- 1. The project will not install outdoor lighting that directly illuminates neighboring properties.
- 2. The project will not install outdoor lighting that would cast a direct beam angle towards a potential observer, such as a motorists, cyclist or pedestrian.
- 3. The project will not install outdoor lighting for vertical surfaces such as buildings, landscaping, or signs in a manner that would result in useful light or spill light being cast beyond the boundaries of intended area to be lit.
- 4. The project will not install any highly reflective surfaces such as glare-producing glass or high-gloss surface color that will be visible along roadways, pedestrian walkways, or in the line of sight of adjacent properties.

The project will not contribute to significant cumulative impacts on day or nighttime views because the project will conform to the Light Pollution Code. The Code was developed by the San Diego County Department of Planning and Land Use and Department of Public Works in cooperation with lighting engineers, astronomers, land use planners from San Diego Gas and Electric, Palomar and Mount Laguna observatories, and local community planning and sponsor groups to effectively address and minimize the impact of new sources light pollution on nighttime views. The standards in the Code are the result of this collaborative effort and establish an acceptable level for new lighting. Compliance with the Code is required prior to issuance of any building permit for any project. Mandatory compliance for all new building permits ensures that this project in combination with all past, present and future projects will not contribute to a cumulatively considerable impact. Therefore, compliance with the Code ensures that the project will not create a significant new source of substantial light or glare, which would adversely affect daytime or nighttime views in the area, on a project or cumulative level.

In addition, the project's outdoor lighting is controlled through the Major Use Permit, which further limits outdoor lighting through strict controls. Therefore, compliance with the Code, in combination with the outdoor lighting and glare controls listed above ensures that the project will not create a significant new source of substantial light or glare.

<u>II. AGRICULTURE RESOURCES</u> -- In determining whether impacts to agricultural resources are significant environmental effects, lead agencies may refer to the

the Ca	rnia Agricultural Land Evaluation and Site alifornia Department of Conservation as a ts on agriculture and farmland. Would th	an opt	ional model to use in assessing

	Potentially Significant Unless Mitigation Incorporated	\checkmark	No Impact

July 27, 2006

Discussion/Explanation:

No Impact: The project site and surrounding area within radius of three miles do not contain any lands designated as Prime Farmland, Unique Farmland, Farmland of Statewide Importance or Farmland of Local Importance as shown on the maps prepared pursuant to the Farmland Mapping and Monitoring Program of the California Resources Agency. Therefore, no Prime Farmland, Unique Farmland, Farmland of Statewide, or Farmland of Local Importance will be converted to a non-agricultural use.

III. AIR QUALITY -- Where available, the significance criteria established by the

	the following determinations. Would the				
a)	Conflict with or obstruct implementation Strategy (RAQS) or applicable portions		,		
	Potentially Significant Impact Potentially Significant Unless Mitigation Incorporated		Less than Significant Impact No Impact		
Discu	ssion/Explanation:				
anticipo Opera polluta as ide not ex consis	Less Than Significant Impact: The project proposes development that was anticipated in SANDAG growth projections used in development of the RAQS and SIP. Operation of the project will not result in emissions of significant quantities of criteria pollutants listed in the California Ambient Air Quality Standards or toxic air contaminants as identified by the California Air Resources Board. As such, the proposed project is not expected to conflict with either the RAQS or the SIP. In addition, the project is consistent the SANDAG growth projections used in the RAQS and SIP, therefore, the project will not contribute to a cumulatively considerable impact.				
b)	Violate any air quality standard or contribution?	bute s	ubstantially to an existing or		
	Potentially Significant Impact Potentially Significant Unless		Less than Significant Impact No Impact		

Discussion/Explanation:

Mitigation Incorporated

In general, air quality impacts from land use projects are the result of emissions from motor vehicles, and from short-term construction activities associated with such projects. The San Diego County Air Pollution Control District (SDAPCD) has established screening-level criteria for all new source review (NSR) in APCD Rule 20.2. For CEQA purposes, these screening-level criteria can be used as numeric methods to

demonstrate that a project's total emissions (e.g. stationary and fugitive emissions, as well as emissions from mobile sources) would not result in a significant impact to air quality. Since APCD does not have screening-level criteria for emissions of volatile organic compounds (VOCs), the use of the screening level for reactive organic compounds (ROC) from the CEQA Air Quality Handbook for the South Coast Air Basin (SCAB), which has stricter standards for emissions of ROCs/VOCs than San Diego's, is appropriate. However, the eastern portions of the county have atmospheric conditions that are characteristic of the Southeast Desert Air Basin (SEDAB). SEDAB is not classified as an extreme non-attainment area for ozone and therefore has a less restrictive screening-level. Projects located in the eastern portions of the County can use the SEDAB screening-level threshold for VOCs.

Less Than Significant Impact: Grading operations associated with the construction of the project would be subject to County of San Diego Grading Ordinance, which requires the implementation of dust control measures. Emissions from the construction phase would be minimal and localized, resulting in pollutant emissions below the screening-level criteria established by SDAPCD Rule 20.2 and by the South Coast Air Quality Management District (SCAQMD) CEQA Air Quality Handbook section 6.2 and 6.3. In addition, the vehicle trips generated from the project will result in 62 Average Daily Trips (ADTs). According to the Bay Area Air Quality Management District CEQA Guidelines for Assessing the Air Quality Impacts of Projects and Plans, projects that generate less than 2,000 ADT are below the Screening-Level Criteria established by SDAPCD Rule 20.2 and by the SCAQMD CEQA Air Quality Handbook section 6.2 and 6.3 for criteria pollutants. As such, the project will not violate any air quality standard or contribute substantially to an existing or projected air quality violation.

د	Result in a cumulatively considerable nowhich the project region is non-attainment ambient air quality standard (including requantitative thresholds for ozone precure	ent und releasi	der an applicable federal or state ng emissions which exceed
	Potentially Significant Impact Potentially Significant Unless Mitigation Incorporated		Less than Significant Impact No Impact

Discussion/Explanation:

San Diego County is presently in non-attainment for the 1-hour concentrations under the California Ambient Air Quality Standard (CAAQS) for Ozone (O₃). San Diego County is also presently in non-attainment for the annual geometric mean and for the 24-hour concentrations of Particulate Matter less than or equal to 10 microns (PM₁₀) under the CAAQS. O₃ is formed when volatile organic compounds (VOCs) and nitrogen oxides (NO_x) react in the presence of sunlight. VOC sources include any source that burns fuels (e.g., gasoline, natural gas, wood, oil); solvents; petroleum processing and storage; and pesticides. Sources of PM₁₀ in both urban and rural areas include: motor vehicles, wood burning stoves and fireplaces, dust from construction, landfills,

agriculture, wildfires, brush/waste burning, and industrial sources of windblown dust from open lands.

Less Than Significant Impact: Air quality emissions associated with the project include emissions of PM₁₀, NO_x and VOCs from construction/grading activities, as well as VOCs as the result of increase of traffic from operations at the facility. However, grading operations associated with the construction of the project would be subject to County of San Diego Grading Ordinance, which requires the implementation of dust control measures. Emissions from the construction phase would be minimal and localized, resulting in PM₁₀ and VOC emissions below the screening-level criteria established by SDAPCD Rule 20.2 and by the South Coast Air Quality Management District (SCAQMD) CEQA air quality handbook section 6.2 and 6.3. The vehicle trips generated from the project will result in 62 Average Daily Trips (ADTs). According to the Bay Area Air Quality Management District CEQA Guidelines for Assessing the Air Quality Impacts of Projects and Plans, projects that generate less than 2,000 ADT are below the Screening-Level Criteria established by SDAPCD Rule 20.2 and by the SCAQMD CEQA air quality handbook section 6.2 and 6.3 for VOCs and PM₁₀.

In addition, a list of past, present and future projects within the surrounding area were evaluated and none of these projects emit significant amounts of criteria pollutants. Refer to XVII. Mandatory Findings of Significance for a comprehensive list of the projects considered. The proposed project as well as the past, present and future projects within the surrounding area, have emissions below the screening-level criteria established by SDAPCD Rule 20.2 and by the SCAQMD CEQA air quality handbook section 6.2 and 6.3, therefore, the construction and operational emissions associated with the proposed project are not expected to create a cumulatively considerable impact nor a considerable net increase of PM10, or any O₃ precursors.

d)	E	Expose sensitive receptors to substant	ial poll	utant concentrations?
]		Potentially Significant Impact Potentially Significant Unless Mitigation Incorporated		Less than Significant Impact No Impact
Disc	uss	sion/Explanation:		

Air quality regulators typically define sensitive receptors as schools (Preschool-12th Grade), hospitals, resident care facilities, or day-care centers, or other facilities that may house individuals with health conditions that would be adversely impacted by changes in air quality.

Less Than Significant Impact: The project contains a school. However, the project is not located within a quarter-mile (the radius determined by the SCAQMD in which the dilution of pollutants is typically significant) of any identified source of significant emissions. Similarly, the project does not propose uses or activities that would result in exposure of these sensitive receptors to significant pollutant concentrations. In addition,

the project will not contribute to a cumulatively considerable exposure of sensitive receptors to substantial pollutant concentrations because proposed project as well as the listed projects have emissions below the screening-level criteria established by SDAPCD Rule 20.2 and by the SCAQMD CEQA air quality handbook section 6.2 and 6.3.

e)	Create objectionable odors affecting a s	substa	ntial number of people?
	Potentially Significant Impact Potentially Significant Unless Mitigation Incorporated		Less than Significant Impact No Impact
Discus	sion/Explanation:		
would sulfide endoto if prese signific Moreovarea and fut project	result from volatile organic compounds, methane, alcohols, aldehydes, amines exins from the construction and operation and air quality – odor impacts are expected, the affects of objectionable odors and will not contribute to a cumulatively of the projects within the surrounding area are expected to a compound of the projects considerable odors. a)	OLOGICAL RESOURCES Would the Have a substantial adverse effect, either on any species identified as a candidate local or regional plans, policies, or regulates and Game or U.S. Fish and Wildlife	r direc e, sens lations	etly or through habitat modifications sitive, or special status species in s, or by the California Department of
	Potentially Significant Impact Potentially Significant Unless Mitigation Incorporated		Less than Significant Impact No Impact

Discussion/Explanation:

No Impact: Based on an analysis of the County's Geographic Information System (GIS) records, the County's Comprehensive Matrix of Sensitive Species, and a site visit by County staff, it has been determined that the site has been completely disturbed and contains no native vegetation or habitats. Therefore, no species identified as a candidate, sensitive, or special status species in local or regional plans, policies, or regulations, or by the California Department of Fish and Game or U.S. Fish and Wildlife Service would be expected to occur on-site.

b)

Have a substantial adverse effect on any riparian habitat or other sensitive

	natural community identified in local or rethe the California Department of Fish and G	-	
	Potentially Significant Impact		Less than Significant Impact
	Potentially Significant Unless Mitigation Incorporated	$\overline{\checkmark}$	No Impact
Discuss	sion/Explanation:		
project as defir of San Fish an regiona habitat resultin expecte	site does not contain any riparian habitated by the County of San Diego Multiple Diego Resource Protection Ordinance, Ind Game Code, Endangered Species Act plans, policies or regulations. In additional has been identified within or adjacent to grom road improvements, utility extensed to have direct or indirect impacts from ensitive natural community.	ats or some Special Sp	other sensitive natural communities cies Conservation Program, County al Community Conservation Plan, an Water Act, or any other local or priparian or otherwise sensitive area proposed for off-site impacts etc. Therefore, the project is not
, s	Have a substantial adverse effect on fed Section 404 of the Clean Water Act (incl bool, coastal, etc.) through direct remova other means?	uding	, but not limited to, marsh, vernal
	Potentially Significant Impact		Less than Significant Impact
	Potentially Significant Unless Mitigation Incorporated	$\overline{\checkmark}$	No Impact
D:	sion/Evalonation		

Discussion/Explanation:

No Impact: County staff has conducted a site visit and determined that the proposed project site does not contain any wetlands as defined by Section 404 of the Clean Water Act, including, but not limited to, marsh, vernal pool, stream, lake, river or water of the U.S., that could potentially be impacted through direct removal, filling, hydrological interruption, diversion or obstruction by the proposed development. Therefore, no impacts will occur to wetlands defined by Section 404 of the Clean Water Act in which the Army Corps of Engineers maintains jurisdiction over.

d) Interfere substantially with the movement of any native resident or migratory fish or wildlife species or with established native resident or migratory wildlife corridors, or impede the use of native wildlife nursery sites?

	Initial Study, 9W ⁴ , Log No. 04-18-003	- 13 -		July 27, 2006
	Potentially Significant Impact Potentially Significant Unless Mitigation Incorporated			Less than Significant Impact No Impact

, (Conflict with the provisions of any Communities Conservation Plan, conservation plan or any other locresources?	other a _l	pprov	
	Potentially Significant Impact Potentially Significant Unless Mitigation Incorporated			Less than Significant Impact No Impact
Discus	sion/Explanation:			
Less Than Significant Impact: Refer to the attached Ordinance Compliance Checklist dated July 27, 2006 for further information on consistency with any adopted Habitat Conservation Plan, Natural Communities Conservation Plan, other approved local, regional or state habitat conservation plan, including, Habitat Management Plans (HMP) Special Area Management Plans (SAMP) or any other local policies or ordinances that protect biological resources including the Multiple Species Conservation Program (MSCP), Biological Mitigation Ordinance, Resource Protection Ordinance (RPO), Habitat Loss Permit (HLP).				
a) (TURAL RESOURCES Would a Cause a substantial adverse chan as defined in 15064.5?		-	nificance of a historical resource
	Potentially Significant Impact Potentially Significant Unless Mitigation Incorporated			Less than Significant Impact No Impact

July 27, 2006

Discussion/Explanation:

No Impact: The project will not impact historical resources, because prior grading of the project site has eliminated any potential for impacts to buried historical resources.

b)	Cause a substantial adverse change in resource pursuant to 15064.5?	the si	gnificance of an archaeological
	Potentially Significant Impact Potentially Significant Unless Mitigation Incorporated		Less than Significant Impact No Impact
Discu	ssion/Explanation:		
	pact: The project will not impact archae oject site has eliminated any potential forces.		
c)	Directly or indirectly destroy a unique pageologic feature?	aleont	ological resource or site or unique
	Potentially Significant Impact Potentially Significant Unless Mitigation Incorporated		Less than Significant Impact No Impact

Discussion/Explanation:

Less Than Significant Impact: Unique Paleontological Resources - A review of the paleontological maps provided by the San Diego Museum of Natural History, combined with available data on San Diego County's geologic formations, indicates that the project is located on geological formations that have marginal resource potential. Marginal resource potential is assigned to geologic formations that are composed either of volcanic rocks or high-grade metasedimentary rocks, and have only limited probability for producing fossil remains from certain sedimentary lithologies at localized outcrops. Due to site's limited potential to support any fossil remains, the project will not result in the loss of significant paleontological information.

In addition, the project does not propose any grading that will exceed a cut depth of 10 feet. The minimum graded cut depth of 10 feet is the approximate depth at which bedrock is unweathered and is the depth at which unique paleontological resources can typically begin to be found. This excavation guideline is based on professional opinions of paleontological experts from the San Diego Natural History Museum and discussions with City and County of San Diego staff. Therefore, the project will not result in the permanent loss of significant paleontological information. Moreover, the project will not contribute to a cumulatively considerable loss of information, because all projects that exceed a cut depth

of 10 feet and will disturb the unweathered bedrock in the areas with high or moderate resource potential are required to have a paleontological monitor present during grading operations.

Unique Geologic Features – The site does not contain any unique geologic features that have been catalogued within the Conservation Element (Part X) of the County's General Plan or support any known geologic characteristics that have the potential to support unique geologic features.

d)	Disturb any human remains, including the cemeteries?	nose ii	nterred outside of formal

	Potentially Significant Impact		Less than Significant Impact
	Potentially Significant Unless Mitigation Incorporated	V	No Impact
Discus	ecion/Evalenation:		

Discussion/Explanation:

No Impact: The project is not located in a fault rupture hazard zone identified by the Alquist-Priolo Earthquake Fault Zoning Act, Special Publication 42, Revised 1997, Fault-Rupture Hazards Zones in California. Therefore, there will be no impact from the exposure of people or structures to adverse effects from a known hazard zone as a result of this project.

ii. Strong seismic ground shaking?

CEQA Initial Study, P69-129W ⁴ , Log No. 04-18-003		- 17 -	July 27, 200	
b)	Result in substantial soil eros	sion or the loss o	f topsoil?	
[Potentially Significant Impa	ict 🗹	Less than Significant Impact	

No Impact

Discussion/Explanation:

Potentially Significant Unless

Mitigation Incorporated

Less Than Significant Impact: According to the Soil Survey of San Diego County, the soils on-site are identified as Escondido very fine sandy loam that has a soil erodibility rating of "severe" as indicated by the Soil Survey for the San Diego Area, prepared by the US Department of Agriculture, Soil Conservation and Forest Service dated December 1973. However, the project will not result in substantial soil erosion or the loss of topsoil for the following reasons:

- The project will not result in unprotected erodible soils; will not alter existing drainage patterns; is not located in a floodplain, wetland, or significant drainage feature; and will not develop steep slopes.
- The project has prepared a Storm Water Management Plan which includes Best Management Practices to ensure sediment does not erode from the project site.
- The project involves grading. However, the project is required to comply with the San Diego County Code of Regulations, Title 8, Zoning and Land Use Regulations, Division 7, Sections 87.414 (DRAINAGE - EROSION PREVENTION) and 87.417 (PLANTING). Compliance with these regulations minimizes the potential for water and wind erosion.

Due to these factors, it has been found that the project will not result in substantial soil erosion or the loss of topsoil on a project level.

In addition, the project will not contribute to a cumulatively considerable impact because all the of past, present and future projects included on the list of projects that involve grading or land disturbance are required to follow the requirements of the San Diego County Code of Regulations, Title 8, Zoning and Land Use Regulations, Division 7, Sections 87.414 (DRAINAGE - EROSION PREVENTION) and 87.417 (PLANTING); Order 2001-01 (NPDES No. CAS 0108758), adopted by the San Diego Region RWQCB on February 21, 2001; County Watershed Protection, Storm Water Management, and Discharge Control Ordinance (WPO) (Ord. No. 9424); and County Storm water Standards Manual adopted on February 20, 2002, and amended January 10, 2003 (Ordinance No. 9426). Refer to XVII. Mandatory Findings of Significance for a comprehensive list of the projects considered.

c) Will the project produce unstable geological conditions that will result in adverse impacts resulting from landslides, lateral spreading, subsidence, liquefaction or collapse?

	Initial Study, 29W ⁴ , Log No. 04-18-003	- 18 -	July 27, 2006
	Potentially Significant Impact Potentially Significant Unless Mitigation Incorporated		Less than Significant Impact No Impact

No Impact: The proposed project is not within one mile of a private airstrip. As a result, the project will not constitute a safety hazard for people residing or working in the project area.

Impair implementation of or physically in response plan or emergency evacuation	
Potentially Significant Impact Potentially Significant Unless Mitigation Incorporated	Less than Significant Impact No Impact

The following sections summarize the project's consistency with applicable emergency response plans or emergency evacuation plans.

i. OPERATIONAL AREA EMERGENCY PLAN:

Less Than Significant Impact: The Operational Area Emergency Plan is a framework document that provides direction to local jurisdictions to develop specific operational area of San Diego County. It provides guidance for emergency planning and requires subsequent plans to be established by each jurisdiction that has responsibilities in a disaster situation. The project will not interfere with this plan because it will not prohibit subsequent plans from being established.

ii. SAN DIEGO COUNTY NUCLEAR POWER STATION EMERGENCY RESPONSE PLAN

No Impact: The San Diego County Nuclear Power Station Emergency Response Plan will not be interfered with by the project due to the location of the project, plant and the specific requirements of the plan. The emergency plan for the San Onofre Nuclear Generating Station includes an emergency planning zone within a 10-mile radius. All land area within 10 miles of the plant is not within the jurisdiction of the unincorporated County and as such a project in the unincorporated area is not expected to interfere with any response or evacuation.

iii. OIL SPILL CONTINGENCY ELEMENT

No Impact: The Oil Spill Contingency Element will not be interfered with because the project is not located along the coastal zone or coastline.

iv. EMERGENCY WATER CONTINGENCIES ANNEX AND ENERGY SHORTAGE RESPONSE PLAN

No Impact: The Emergency Water Contingencies Annex and Energy Shortage Response Plan will not be interfered with because the project does not propose altering major water or energy supply infrastructure, such as the California Aqueduct.

v. DAM EVACUATION PLAN

No Impact: The Dam Evacuation Plan will not be interfered with because the project is located outside a dam inundation zone.

,	Expose people or structures to a significant risk of loss, injury or death involving wildland fires, including where wildlands are adjacent to urbanized areas or where residences are intermixed with wildlands?

Propose a use, or place residents adjacent to an existing or reasonably foreseeable use that would substantially increase current or future resident's exposure to vectors, including mosquitoes, rats or flies, which are capable of transmitting significant public health diseases or nuisances?					
Disques	Potentially Significant Impact Potentially Significant Unless Mitigation Incorporated		Less than Significant Impact No Impact		

Discussion/Explanation:

No Impact: The project does not involve or support uses that allow water to stand for a period of 72 hours (3 days) or more (e.g. artificial lakes, agricultural irrigation ponds). Also, the project does not involve or support uses that will produce or collect animal waste, such as equestrian facilities, agricultural operations (chicken coops, dairies etc.), solid waste facility or other similar uses. Therefore, the project will not substantially increase current or future resident's exposure to vectors, including mosquitoes, rats or flies.

VIII. HYDROLOGY AND WATER QUALITY -- Would the project:

Violate any waste discharge requirements?

CEQA Initial Study, P69-129W ⁴ , Log No. 04-18-003	- 23 -	July 27, 2006			
Potentially Significant Impact Potentially Significant Unless Mitigation Incorporated Discussion/Explanation:		Less than Significant Impact No Impact			
Less Than Significant Impact: The progrequire waste discharge requirement perfectification from the San Diego Regional However, the project site proposes and was measures and/or source control BMPs are potential pollutants to the maximum exterestant These measures will enable the project to require by the Land-Use Planning for New Component of the San Diego Municipal Program (JURMP) and Standard Urban Standa	mits, NPDE I Water Qua vill be requir nd/or treatm nt practicabl o meet wast ew Develop Permit (SDR urisdictional	S permits, or water quality ality Control Board (SDRWQCB). The decided to implement site design and control BMPs to reduce the from entering storm water runoff. The discharge requirements as ment and Redevelopment always and Runoff Management.			
Finally, the project's conformance to the waste discharge requirements listed above ensures the project will not create cumulatively considerable water quality impacts related to waste discharge because, through the permit, the project will conform to Countywide watershed standards in the JURMP and SUSMP, derived from State regulation to address human health and water quality concerns. Therefore, the project will not contribute to a cumulatively considerable impact to water quality from waste discharges.					
ls the project tributary to an already impaired water body, as listed on the Clean Water Act Section 303(d) list? If so, could the project result in an increase in any pollutant for which the water body is already impaired?					
Potentially Significant Impact Potentially Significant Unless Mitigation Incorporated Discussion/Explanation:		Less than Significant Impact No Impact			

Less Than Significant Impact: The project lies in the La Nacion hydrologic subarea, within the Sweetwater hydrologic unit. According to the Clean Water Act Section 303(d) list, July 2003, although portions of the San Diego Bay are impaired for coliform bacteria, no portion of the Sweetwater River, which is tributary to the Bay, is impaired. Constituents of concern in the Sweetwater River watershed include coliform bacteria

and trace metals.

The project proposes construction and operation impacts that can generate pollutants. However, the following site design measures and/or source control BMPs and/or treatment control BMPs will be employed such that potential pollutants will be reduced in any runoff to the maximum extent practicable so as not to increase the level of these pollutants in receiving waters: landscaping and vegetation maintenance, minimizing impervious surface footprint and drain connections, bio-filtration swales and energy dissipating riprap.

The proposed BMPs are consistent with regional surface water and storm water planning and permitting process that has been established to improve the overall water quality in County watersheds. As a result the project will not contribute to a cumulative impact to an already impaired water body, as listed on the Clean Water Act Section 303(d). Regional surface water and storm water permitting regulation for County of San Diego, Incorporated Cities of San Diego County, and San Diego Unified Port District includes the following: Order 2001-01 (NPDES No. CAS 0108758), adopted by the San Diego Region RWQCB on February 21, 2001; County Watershed Protection, Storm Water Management, and Discharge Control Ordinance (WPO) (Ord. No. 9424); County Storm water Standards Manual adopted on February 20, 2002, and amended January 10, 2003 (Ordinance No. 9426). The stated purposes of these ordinances are to protect the health, safety and general welfare of the County of San Diego residents; to protect water resources and to improve water quality; to cause the use of management practices by the County and its citizens that will reduce the adverse effects of polluted runoff discharges on waters of the state; to secure benefits from the use of storm water as a resource; and to ensure the County is compliant with applicable state and federal laws. Ordinance No. 9424 (WPO) has discharge prohibitions, and requirements that vary depending on type of land use activity and location in the County. Ordinance No. 9426 is Appendix A of Ordinance No. 9424 (WPO) and sets out in more detail, by project category, what Dischargers must do to comply with the Ordinance and to receive permits for projects and activities that are subject to the Ordinance. Collectively, these regulations establish standards for projects to follow which intend to improve water quality from headwaters to the deltas of each watershed in the County. Each project subject to WPO is required to prepare a Storm water Management Plan that details a project's pollutant discharge contribution to a given watershed and propose BMPs or design measures to mitigate any impacts that may occur in the watershed.

c)	Could the proposed project cause surface or groundwater receiving beneficial uses?		
	☐ Potentially Significant Impact	\checkmark	Less than Significant Impact
	Potentially Significant Unless Mitigation Incorporated		No Impact

Less Than Significant Impact: The Regional Water Quality Control Board has designated water quality objectives for waters of the San Diego Region as outlined in Chapter 3 of the Water Quality Control Plan (Plan). The water quality objectives are necessary to protect the existing and potential beneficial uses of each hydrologic unit as described in Chapter 2 of the Plan.

The project lies in the La Nacion hydrologic subarea, within the Sweetwater hydrologic unit that has the following existing and potential beneficial uses for inland surface waters, coastal waters, reservoirs and lakes, and ground water: municipal and domestic supply; agricultural supply; industrial process supply, industrial service supply; contact water recreation; non-contact water recreation; warm freshwater habitat; cold freshwater habitat; wildlife habitat; preservation of biological habitats of special significance; and rare, threatened, or endangered species habitat.

The project proposes construction and operation impacts that can potentially generate polluted runoff: However, the following site design measures and/or source control BMPs and/or treatment control BMPs will be employed to reduce potential pollutants in runoff to the maximum extent practicable, such that the proposed project will not cause or contribute to an exceedance of applicable surface or groundwater receiving water quality objectives or degradation of beneficial uses: landscaping and vegetation maintenance, minimizing impervious surface footprint and drain connections, bio-filtration swales and energy dissipating riprap.

In addition, the proposed BMPs are consistent with regional surface water, storm water and groundwater planning and permitting process that has been established to improve the overall water quality in County watersheds. As a result, the project will not contribute to a cumulatively considerable exceedance of applicable surface or groundwater receiving water quality objectives or degradation of beneficial uses. Refer to Section VIII., Hydrology and Water Quality, Question b, for more information on regional surface water and storm water planning and permitting process.

d)	groundwater recharge such that the a lowering of the local groundwater	ter supplies or interfere substantially with there would be a net deficit in aquifer volumeter table level (e.g., the production rate of proto to a level which would not support existing permits have been granted)?		
	Potentially Significant Impact		Less than Significant Impact	
	Potentially Significant Unless Mitigation Incorporated	\checkmark	No Impact	

July 27, 2006

Discussion/Explanation:

No Impact: The project will obtain its water supply from the Helix Water District that obtains water from surface reservoirs or other imported water source. The project will not use any groundwater for any purpose, including irrigation, domestic or commercial demands. In addition, the project does not involve operations that would interfere substantially with groundwater recharge including, but not limited to the following: the project does not involve regional diversion of water to another groundwater basin; or diversion or channelization of a stream course or waterway with impervious layers, such as concrete lining or culverts, for substantial distances (e.g. ¼ mile). These activities and operations can substantially affect rates of groundwater recharge. Therefore, no impact to groundwater resources is anticipated.

e) Substantially alter the existing drainage pattern of the site of through the alteration of the course of a stream or river, in a result in substantial erosion or siltation on- or off-site?	•
☐ Potentially Significant Impact ☐ Less than Significant Unless ☐ No Impact ☐ No Impact	gnificant Impact
willigation incorporated	

Discussion/Explanation:

Less Than Significant Impact: As outlined in the Storm water Management Plan (SWMP) dated April 19, 2006 and prepared by Burkett & Wong, the project will implement the following site design measures, source control, and/or treatment control BMPs to reduce potential pollutants, including sediment from erosion or siltation, to the maximum extent practicable from entering storm water runoff: landscaping and vegetation maintenance, minimizing impervious surface footprint and drain connections, bio-filtration swales and energy dissipating riprap. These measures will control erosion and sedimentation and satisfy waste discharge requirements as required by the Land-Use Planning for New Development and Redevelopment Component of the San Diego Municipal Permit (SDRWQCB Order No. 2001-01), as implemented by the San Diego County Jurisdictional Urban Runoff Management Program (JURMP) and Standard Urban Storm Water Mitigation Plan (SUSMP). The SWMP specifies and describes the implementation process of all BMPs that will address equipment operation and materials management, prevent the erosion process from occurring, and prevent sedimentation in any onsite and downstream drainage swales. The Department of Public Works will ensure that the Plan is implemented as proposed. Due to these factors, it has been found that the project will not result in significantly increased erosion or sedimentation potential and will not alter any drainage patterns of the site or area onor off-site. In addition, because erosion and sedimentation will be controlled within the boundaries of the project, the project will not contribute to a cumulatively considerable impact. For further information on soil erosion refer to VI., Geology and Soils, Question b.

a)	PISE Would the project result in: Exposure of persons to or generation of established in the local general plan or rot of other agencies?		
	Potentially Significant Impact Potentially Significant Unless Mitigation Incorporated		Less than Significant Impact No Impact
Discus	sion/Explanation:		

Less Than Significant Impact: The project is the planned expansion of the existing church and school and will be occupied by local residents and students under daytime conditions. Based on a site visit completed by Dag Bunnemeyer on September 9, 2004, and as described in the Noise Analysis prepared by EDAW, Inc and dated September 15, 2004, the surrounding area supports residential uses and is occupied by local residents. The project will not expose people to potentially significant noise levels that exceed the allowable limits of the County of San Diego General Plan, County of San Diego Noise Ordinance, and other applicable standards for the following reasons:

General Plan - Noise Element

The County of San Diego General Plan, Noise Element, Policy 4b addresses noise sensitive areas and requires an acoustical study to be prepared for any use that may expose noise sensitive areas to noise in excess of a Community Noise Equivalent Level (CNEL) of 60 decibels (dab). Moreover, if the project is excess of CNEL 60 dB(A), modifications must be made to the project to reduce noise levels. Noise sensitive areas include residences, hospitals, schools, libraries or similar facilities where quiet are an important attribute. Project implementation is not expected to expose existing or planned noise sensitive areas to road, airport, heliport, railroad, industrial or other noise in excess of the CNEL 60 dB(A). This is based on staff's review of projected County noise contour maps (CNEL 60 dB(A) contours) and a review of daytime classroom uses by County Noise Specialist, John Bennett, on September 23, 2004. Therefore, the project will not expose people to potentially significant noise levels that exceed the allowable limits of the County of San Diego General Plan, Noise Element.

Noise Ordinance – Section 36-404

Based on a Noise Analysis prepared by EDAW, Inc and dated September 15, 2004, non-transportation noise generated by the project is not expected to exceed the standards of the County of San Diego Noise Ordinance (Section 36-404) at or beyond the project's property line. The site is zoned either RS4 or RS3 that has a one-hour average sound limit of 50 decibels during the day and 45 decibels at night. The adjacent properties are RS3, RS4, or RS7 and have one-hour day/night average sound limit of 50/45 decibels. The Noise Analysis state's the project's noise levels at the adjoining properties will be 45 decibels and will not exceed County Noise Standards. Project design considerations were included to insure noise compliance and they were parapet walls for rooftop equipment, equipment noise performance specifications, and hours of operation for the day use facilities (the adult center and the classroom trailers).

Noise Ordinance - Section 36-410

Based on a Noise Analysis prepared by EDAW, Inc and dated September 15, 2004, the project will not generate construction noise that may exceed the standards of the County of San Diego Noise Ordinance (Section 36-410). Construction operations will occur only during permitted hours of operation pursuant to Section 36-410. Also, it is not anticipated that the project will operate construction equipment in excess of an average sound level of 75 dB between the hours of 7:00 AM and 7:00 PM.

Finally, the project's conformance to the County of San Diego General Plan (Noise Element, Policy 4b) and County of San Diego Noise Ordinance (Section 36-404 and 36.410) ensures the project will not create cumulatively considerable noise impacts, because the project will not exceed the local noise standards for noise sensitive areas; and the project will not exceed the applicable noise level limits at the property line or construction noise limits, derived from State regulation to address human health and quality of life concerns. Therefore, the project will not contribute to a cumulatively considerable exposure of persons or generation of noise levels in excess of standards established in the local general plan, noise ordinance, and applicable standards of other agencies.

	A substantial permanent increase in ambabove levels existing without the project		noise levels in the project vicinity
	Potentially Significant Impact Potentially Significant Unless Mitigation Incorporated		Less than Significant Impact No Impact

Less Than Significant Impact: The project involves the following permanent noise sources that may increase the ambient noise level: air conditioners and mechanical ventilation. As indicated in the response listed under Section XI Noise, Question a., the project would not expose existing or planned noise sensitive areas in the vicinity to a substantial permanent increase in noise levels that exceed the allowable limits of the County of San Diego General Plan, County of San Diego Noise Ordinance, and other applicable local, State, and Federal noise control. Also, the project is not expected to

expose existing or planned noise sensitive areas to noise 10 dB CNEL over existing ambient noise levels based on a Noise Analysis prepared by EDAW, Inc and dated September 15, 2004. The project will increase the ambient noise level by less than 1 decibel. Studies completed by the Organization of Industry Standards (ISO 362; ISO 1996 1-3; ISO 3095; and ISO 3740-3747) state an increase of 10 dB is perceived as twice as loud and is perceived as a significant increase in the ambient noise level.

The project will not result in cumulatively noise impacts because a list of past, present and future projects within in the vicinity were evaluated. It was determined that the project in combination with a list of past, present and future project would not expose existing or planned noise sensitive areas to noise 10 dB CNEL over existing ambient noise levels. Refer to XVII. Mandatory Findings of Significance for a comprehensive list of the projects considered.

	Potentially Significant Impact Potentially Significant Unless Mitigation Incorporated	Less than Significant Impact No Impact

Discussion/Explanation:

Less Than Significant Impact: The project does not involve any uses that may create substantial temporary or periodic increases in ambient noise levels in the project vicinity including but not limited to extractive industry; outdoor commercial or industrial uses that involve crushing, cutting, drilling, grinding, or blasting of raw materials; truck depots, transfer stations or delivery areas; or outdoor sound systems.

Also, general construction noise is not expected to exceed the construction noise limits of the County of San Diego Noise Ordinance (Section 36-410), which are derived from State regulations to address human health and quality of life concerns. Construction operations will occur only during permitted hours of operation pursuant to Section 36-410. Also, it is not anticipated that the project will operate construction equipment in excess of an average sound level of 75 dB between the hours of 7:00 AM and 7:00 PM. Therefore, the project would not result in a substantial temporary or periodic increase in existing ambient noise levels in the project vicinity.

e) For a project located within an airport land use plan or, where such a plan has not been adopted, within two miles of a public airport or public use airport, would the project expose people residing or working in the project area to excessive noise levels?

	Potentially Significant Impact Potentially Significant Unless Mitigation Incorporated		Less than Significant Impact No Impact
Discuss	sion/Explanation:		
No Impact: The proposed project is not located within a one-mile vicinity of a private airstrip; therefore, the project will not expose people residing or working in the project area to excessive airport-related noise levels.			
XII. POPULATION AND HOUSING Would the project: Induce substantial population growth in an area, either directly (for example, by proposing new homes and businesses) or indirectly (for example, through extension of roads or other infrastructure)?			
	Potentially Significant Impact Potentially Significant Unless Mitigation Incorporated		Less than Significant Impact No Impact
Discuss	sion/Explanation:		

No Impact: The proposed project will not induce substantial population growth in an area because the project does not propose any physical or regulatory change that would remove a restriction to or encourage population growth in an area including, but limited to the following: new or extended infrastructure or public facilities; new commercial or industrial facilities; large-scale residential development; accelerated conversion of homes to commercial or multi-family use; or regulatory changes including General Plan amendments, specific plan amendments, zone reclassifications, sewer or water annexations; or LAFCO annexation actions.

i i	Fire protection?Police protection?Schools?Parks?Other public facilities?		
	Potentially Significant Impact		Less than Significant Impact
	Potentially Significant Unless Mitigation Incorporated	\checkmark	No Impact

Discussion/Explanation:

No Impact: Based on the service availability forms received for the project, the proposed project will not result in the need for significantly altered services or facilities. Service availability forms have been provided which indicate existing services are available to the project from the following agencies/districts: San Miguel Consolidated Fire Protection District, Helix Water District, and Spring Valley Sanitation District. The project does not involve the construction of new or physically altered governmental facilities including but not limited to fire protection facilities, sheriff facilities, schools, or parks in order to maintain acceptable service ratios, response times or other performance service ratios or objectives for any public services. Therefore, the project will not have an adverse physical effect on the environment because the project does not require new or significantly altered services or facilities to be constructed.

XIV. RECREATION

a)	Would the project increase the use of exor other recreational facilities such that stacility would occur or be accelerated?	_	• • • • • • • • • • • • • • • • • • • •
	Potentially Significant Impact Potentially Significant Unless		Less than Significant Impact
Ш	Mitigation Incorporated	\checkmark	No Impact
Discus	sion/Explanation:		
No Impact: The project does not propose any residential use, included but not limited to a residential subdivision, mobilehome park, or construction for a single-family residence that may increase the use of existing neighborhood and regional parks or other recreational facilities in the vicinity.			
b) Does the project include recreational facilities or require the construction or expansion of recreational facilities, which might have an adverse physical effect on the environment?			
	Potentially Significant Impact		Less than Significant Impact
	Potentially Significant Unless Mitigation Incorporated	\checkmark	No Impact
Discus	sion/Explanation:		

No Impact: The project does not include recreational facilities or require the construction or expansion of recreational facilities. Therefore, the construction or expansion of recreational facilities cannot have an adverse physical effect on the environment.

July 27, 2006

XV. TRANSPORTATION/TRAFFIC -- Would the project:

a)	Cause an increase in traffic which is substantial in relation to the existing traffic load and capacity of the street system (i.e., result in a substantial increase in either the number of vehicle trips, the volume to capacity ratio on roads, or congestion at intersections)?		
	Potentially Significant Impact Potentially Significant Unless Mitigation Incorporated		Less than Significant Impact No Impact
Discus	ssion/Explanation:		
Less Than Significant: A Traffic Impact Analysis (TIA), dated April 19, 2006 and prepared by Richard Crafts Engineering, concluded that the proposed project will not result in a substantial increase in the number of vehicle trips, volume of capacity ratio or roads, or congestion at intersections in relation to existing conditions. Therefore, the project will not have a significant direct project impact on traffic volume, which is considered substantial in relation to existing traffic load and capacity of the street system. Also refer to the answer for XV.b. below.			
b)	Exceed, either individually or cumulative established by the County congestion may by the County of San Diego Transportation roads or highways?	anage	ement agency and/or as identified
	Potentially Significant Impact Potentially Significant Unless Mitigation Incorporated		Less than Significant Impact No Impact

Discussion/Explanation:

Potentially Significant Impact Unless Mitigation Incorporated: A Traffic Impact Analysis (TIA), dated April 19, 2006 and prepared by Richard Crafts Engineering, was completed for the proposed project. The Traffic Impact Study concluded that the proposed project will not result in a substantial increase in the number of vehicle trips, which would subsequently directly exceed a level of service (LOS) standards established by the County congestion management agency for designated roads or highways. Therefore, the project will not have a direct significant project impact on LOS standards on the surrounding roads and highways.

However, the County of San Diego has developed an overall programmatic solution that addresses existing and projected future road deficiencies in the unincorporated portion of San Diego County. This program includes the adoption of a Transportation Impact Fee (TIF) program to fund improvements to roadways necessary to mitigate potential cumulative impacts caused by traffic from future development. This program is based

on a summary of projections method contained in an adopted planning document, as referenced in the State CEQA Guidelines Section 15130 (b)(1)(B), which evaluates regional or area wide conditions contributing to cumulative transportation impacts. Based on SANDAG regional growth and land use forecasts, the SANDAG Regional Transportation Model was utilized to analyze projected build-out (year 2030) development conditions on the existing circulation element roadway network throughout the unincorporated area of the County. Based on the results of the traffic modeling, funding necessary to construct transportation facilities that will mitigate cumulative impacts from new development was identified. Existing roadway deficiencies will be corrected through improvement projects funded by other public funding sources, such as TransNet, gas tax, and grants. Potential cumulative impacts to the region's freeways have been addressed in SANDAG's Regional Transportation Plan (RTP). This plan, which considers freeway buildout over the next 30 years, will use funds from TransNet, state, and federal funding to improve freeways to projected level of service objectives in the RTP.

Any trips potentially generated by the proposed project will be distributed on circulation element roadways in the unincorporated county that were analyzed by the TIF program, some of which currently or are projected to operate at inadequate levels of service. These project trips therefore contribute to a potential significant cumulative impact and mitigation is required. The potential growth represented by this project was included in the growth projections upon which the TIF program is based. Therefore, payment of the TIF, which will be required at issuance of building permits, in combination with other components of the program described above, will mitigate potential cumulative traffic impacts to less than significant.

In order to mitigate its incremental contribution to significant cumulative traffic impacts, the proposed project will pay the TIF prior to obtaining building permits.

,	Result in a change in air traffic patterns, evels or a change in location that result	•
	Potentially Significant Impact Potentially Significant Unless Mitigation Incorporated	Less than Significant Impact No Impact

Discussion/Explanation:

No Impact: The proposed project is located outside of an Airport Master Plan Zone and is not adjacent to any public or private airports; therefore, the project will not result in a change in air traffic patterns.

d) Substantially increase hazards due to a design feature (e.g., sharp curves or dangerous intersections) or incompatible uses (e.g., farm equipment)?

, í	Require or result in the construction of n facilities or expansion of existing facilities significant environmental effects?			
	Potentially Significant Impact Potentially Significant Unless Mitigation Incorporated		Less than Significant Impact No Impact	

Discussion/Explanation:

No Impact: The project does not include new or expanded water or wastewater treatment facilities. In addition, the project does not require the construction or expansion of water or wastewater treatment facilities. Based on the service availability forms received, the project will not require construction of new or expanded water or wastewater treatment facilities. Service availability forms have been provided which indicate adequate water and wastewater treatment facilities are available to the project from the following agencies/districts: Helix Water District and Spring Valley Sanitation District. Therefore, the project will not require any construction of new or expanded facilities, which could cause significant environmental effects.

	Initial Study, - 9W ⁴ , Log No. 04-18-003	42 -	July 27, 2006	
· (Require or result in the construction of new storm water drainage facilities or expansion of existing facilities, the construction of which could cause significant environmental effects?			
	Potentially Significant Impact Potentially Significant Unless Mitigation Incorporated		Less than Significant Impact No Impact	
Discuss	sion/Explanation:			
Less Than Significant Impact: The project involves bio-filtration swales and energy dissipating riprap as storm water drainage facilities. Refer to the Storm water Management Plan dated April 19, 2006 for more information. However, as outlined in this Environmental Analysis Form Section I-XVII, the drainage facilities will not result in adverse physical effect on the environment.				
	Have sufficient water supplies availa entitlements and resources, or are n			
	Potentially Significant Impact Potentially Significant Unless Mitigation Incorporated		Less than Significant Impact No Impact	
Discuss	sion/Explanation:			
Less Than Significant Impact: The project requires water service from the Helix Water District. A Service Availability Letter from the Helix Water District has been provided, indicating adequate water resources and entitlements are available to serve the requested water resources. Therefore, the project will have sufficient water supplies available to serve the project.				
e) Result in a determination by the wastewater treatment provider, which serves or may serve the project that it has adequate capacity to serve the project's projected demand in addition to the provider's existing commitments?				
	Potentially Significant Impact Potentially Significant Unless Mitigation Incorporated		Less than Significant Impact No Impact	
Discuss	sion/Explanation:			

Less Than Significant Impact: The project requires wastewater service from the Spring Valley Sanitation District. A Service Availability Letter from the Spring Valley

Sanitation District has been provided, indicating adequate wastewater service capacity

July 27, 2006

is available to serve the requested demand. Therefore, the project will not interfere with any wastewater treatment provider's service capacity.

f)	Be served by a landfill with sufficient permitted capacity to accommodate the project's solid waste disposal needs?				
	Potentially Significant Impact Potentially Significant Unless Mitigation Incorporated		Less than Significant Impact No Impact		
Discu	ssion/Explanation:				
waste opera Enfore Califo Public Title 2 permi is suff	Than Significant Impact: Implementation All solid waste facilities, including lands te. In San Diego County, the County Department Agency issues solid waste facility rnia Integrated Waste Management Board Resources Code (Sections 44001-4401-27, Division 2, Subdivision 1, Chapter 4 (Stated active landfills in San Diego County will be a	ills reconstruction in the contract of the con	quire solid waste facility permits to ent of Environmental Health, Local its with concurrence from the VMB) under the authority of the I California Code of Regulations in 21440et seq.). There are five, emaining capacity. Therefore, there		
g)	Comply with federal, state, and local stawaste?	tutes	and regulations related to solid		
	Potentially Significant Impact Potentially Significant Unless Mitigation Incorporated		Less than Significant Impact No Impact		

Discussion/Explanation:

Less than Significant Impact: Implementation of the project will generate solid waste. All solid waste facilities, including landfills require solid waste facility permits to operate. In San Diego County, the County Department of Environmental Health, Local Enforcement Agency issues solid waste facility permits with concurrence from the California Integrated Waste Management Board (CIWMB) under the authority of the Public Resources Code (Sections 44001-44018) and California Code of Regulations Title 27, Division 2, Subdivision 1, Chapter 4 (Section 21440et seq.). The project will deposit all solid waste at a permitted solid waste facility and therefore, will comply with Federal, State, and local statutes and regulations related to solid waste.

XVII. MANDATORY FINDINGS OF SIGNIFICANCE:

a) Does the project have the potential to degrade the quality of the environment, substantially reduce the habitat of a fish or wildlife species, cause a fish or

wildlife population to drop below self-sustaining levels, threaten to eliminate a plant or animal community, substantially reduce the number or restrict the range of a rare or endangered plant or animal or eliminate important examples of the major periods of California history or prehistory?

Conrado Complex	S03-076

Potentially Significant Unless Mitigation Incorporated: The potential for adverse cumulative effects were considered in the response to each question in sections I through XVI of this form. In addition to project specific impacts, this evaluation considered the projects potential for incremental effects that are cumulatively considerable. As a result of this evaluation, there were determined to be potentially significant cumulative effects related to transportation/traffic. However, mitigation has been included that clearly reduces these cumulative effects to a level below significance. This mitigation includes payment of the Transportation Impact Fee to mitigate cumulatively considerable impacts to transportation/traffic. As a result of this evaluation, there is no substantial evidence that, after mitigation, there are cumulative effects associated with this project. Therefore, this project has been determined not to meet this Mandatory Finding of Significance.

c)	Does the project have environmental eff adverse effects on human beings, either	
	Potentially Significant Impact Potentially Significant Unless Mitigation Incorporated	Less than Significant Impact No Impact

Discussion/Explanation:

Potentially Significant Unless Mitigation Incorporated: In the evaluation of environmental impacts in this Initial Study, the potential for adverse direct or indirect impacts to human beings were considered in the response to certain questions in sections I. Aesthetics, III. Air Quality, VI. Geology and Soils, VII. Hazards and Hazardous Materials, VIII Hydrology and Water Quality XI. Noise, XII. Population and Housing, and XV. Transportation and Traffic. As a result of this evaluation, there were determined to be potentially significant effects to human beings related to

Transportation/Traffic. However, mitigation has been included that clearly reduces these effects to a level below significance. This mitigation includes payment of the Transportation Impact Fee to mitigate cumulatively considerable impacts to

transportation/traffic. As a result of this evaluation, there is no substantial evidence that, after mitigation, there are adverse effects to human beings associated with this project. Therefore, this project has been determined not to meet this Mandatory Finding of Significance.
